EXPERIENCE

PIKKOLO ASSEMBLY

Boulder, CO

Software & Computer Vision Engineering Intern

September 2026 - Present

- Incoming role focused on computer vision AOI for continuous 360° scanning and inspection of manufactured parts.
- Will develop real-time image capture and processing pipelines synchronized with CNC motion and physical hardware.

CROWDCOUNT

Boulder, CO

Founder & Lead Engineer - crowdcount.tech

May 2024 - September 2026

- Founded a B2B computer-vision platform providing real-time occupancy analytics across 25+ sites and 30+ counters.
- Architected the full platform across iOS, Next.js, Python APIs, databases, AWS, and deployed edge cameras.
- Served as sole engineer during the first year, owning product development and foundational engineering end to end.
- Engineered a CUDA-accelerated RTSP server on NVIDIA GPUs that ingests and manages 200+ concurrent streams.
- Deployed a real-time people-counting pipeline using custom YOLO models, OpenCV, PyTorch, ONNX, and TensorRT.
- Trained and tuned CV models on production footage to handle varied lighting, camera angles, and store layouts.
- Built remotely managed Raspberry Pi camera hardware and QR/Bluetooth provisioning for secure customer Wi-Fi setup.
- Led a seven-person cross-functional team across engineering, product, and operations through customer pilots.

UPSTREAM

Boulder, CO

Co-Founder & Software Engineer - upstreamcv.com

May 2026 - August 2026

- Co-founded a CV infrastructure startup focused on real-time video ingestion, delivery, and processing systems.
- Built encrypted SRT ingest and secure MediaMTX playback for low-latency customer video streams.
- Accepted into NVIDIA Inception, receiving \$250K+ in cloud-provider credits and technical startup benefits.
- Reached Techstars' second round, placing in the top 10% of applicants, before consolidating work into CrowdCount.

OUTLIER

Remote

AI Coding Trainer

November 2024 - October 2025

- Created CS tasks & LLM evaluation frameworks for correctness, hallucinations, logical gaps, unsafe code, and edge cases.

RWS GROUP

Superior, CO

Software QA Engineer

March 2025 - December 2025

- Performed functional and French localization QA for unreleased web and software products, primarily for Google.
- Identified customer-facing defects and completed repeated verification cycles to validate fixes before release.

ONEPOINT

Bordeaux, France

Lead Project Developer

Fall 2023

- Led and mentored a student engineering team building a full-stack stock-analysis platform with an ML prediction model.
- Built the frontend, backend, and ML workflow and presented the completed product to Onepoint's C-suite.
